

SOLARPUNK

A game by Phil Grey
Artwork by Carlos Itsumi

Version 3.1

GAME PIECES

1 Double-sided Map board

1 Eco Tracker

4 Prestige markers

4 100 Prestige tiles

120 Building Cards

40 L1

40 L2

40 L3

64 Upgrade Cards

40 L1

24 L2

60 Project Cards

36 L1 (3 each of 9 types)

16 L2 (2 each of 8 types)

8 L3

4 Thriving Community bonus cards

64 Material Tokens (16 each of 4 types)

16 Blueprint Tokens

80 Production Tokens (20 each of 4 types)

160 Population/Shared Tokens (40 each of 4 colours)

40 Takeover Tokens (10 each of 4 colours)

25 Secured Tokens

SETTING & THEME

Solarpunk is a game where you take on the role of small community collecting resources and trying to build a better world, first by repurposing old structures, then creating dedicated and environmentally sound buildings that are in harmony with nature.

Buildings generate production, which is used both to bring down the costs of larger, more complex structures, and also to start long lasting projects that will give you advantages for the rest of the game.

Some buildings are special, and will grant you prestige, pushing you closer to victory. Other buildings will improve ecological harmony, or eco. Some buildings have unique upgrades that will allow you to use special game-changing effects once you build them.

Some building spaces, and some early, high-prestige buildings will actively harm eco, bringing the environment closer to collapse. Be mindful of this, as it can create a certain difficulty spike in the early game—like in real life, getting people to change habits and adopt new technology is fraught with difficulty.

You must also be mindful of the total space available to you, because if you fill the last square on the map, everyone loses due to overpopulation. Even the best laid plans can run afoul of people's desire for more space, or bigger families.

This means finding the ability to share buildings, or even being aggressive and taking them over yourself, may be better than trying to build every shiny thing you can lay your hands on. Be willing to try a new strategy if your current plan doesn't seem to be working. Adaptability is key to creating a sustainable future.

GAME SETUP

1. Place the map in the middle of the playing area.

Place the Eco Tracker (📊) on its starting space on the map (80 Prestige).

2. Separate the Building cards by level (★, ★★, or ★★★) and shuffle each stack.

Flip the top 5 cards from each stack and spread them out to create a Building Queue for each stack.

3. Separate the Upgrade cards by level (⊕ or ⊕⊕) and type (🌿, 🍄, 🌟, 💧). Shuffle each stack and place them near the map.

4. Separate out the Project cards by level (🌀, 🌀🌀, or 🌀🌀🌀), reward and type (🌿, 🍄, 🌟, 💧). Lay these stacks out near the map, in easy reach of all players.

5. For each player taking part in this game, add 4 Resources (🌿, 🍄, 🌟, 💧 + 📄) of each type to form the stack of Resources that will be available to use for this game.

6. Place the Production tokens (🌿, 🍄, 🌟, 💧) near the map, in easy reach of all players.

7. Each player chooses a colour and takes all of their tokens (🍄/🌿 & 🌟/💧) in that colour.

Each player takes a number of Takeover tokens (📄) equal to the number of players in the game, then sets the rest aside.

8. Each player places their Prestige marker on the 0/100 Prestige space in the corner of the map.

The last person to build something is the first player, and takes the first turn. Gameplay proceeds clockwise from the first player.

DEFINITIONS

MAP SPACES & ZONES

Adjacent: Connected to another map space in a straight line. The green spaces are adjacent to the grey space.

Some game effects may allow you to count diagonal spaces as adjacent.

Connected to X: You can trace an unbroken path of adjacent Buildings to X. The orange space is Connected to the green Starting Space.

Starting Space: Spaces with silver bordered triangles. The first Building placed on the map must be placed in one of these 5 spaces.

Additional Buildings may be placed in these spaces, or adjacent to existing Buildings.

Empty Space: A map space that contains no gameplay symbols (☙, 🍃, ✨, 💧, 🔴, or ?). The blue bordered space is an Empty Space.

Natural Resources: These spaces provide the shown Materials (☙, 🍃, ✨, 💧), reducing the cost of any Building placed on them. The green bordered space will provide 2 Starlight (✨) for any Building placed there.

Devastated Zone: These spaces harm Eco (🔴), moving the Eco Tracker (🔴) clockwise around the prestige track (towards **Collapse**) if a Building is placed on them. The red bordered space is a Devastated Zone.

Prestigious Location: These spaces are important and valuable, and increase your Prestige (🔴) if you place a Building on them. The yellow bordered space is a Prestigious Location.

Isolated Areas: A group of 3 or less Connected Buildings that are not Connected to any Starting Spaces.

You cannot normally place Buildings adjacent to Isolated Areas unless one of the following is true:

- ▶ This Building would connect the Isolated Area with a Starting Space.
- ▶ You Own a Building, or have a Shared token (👤) on a Building in the Isolated Area.

The green Buildings, above, form an Isolated Area. Only players that Own or Share those Buildings can place Buildings in the red spaces. Any player may place a Building in the blue space, as it Connects the Isolated Area to a Starting Space.

SECURED BUILDINGS

A Building is considered Secured if it has a Secured token (🔒) on it, or the Secured symbol as one of its rewards.

- ▶ Secured Buildings cannot have Shared tokens (👤) or Takeover tokens (🔪) placed on them for any reason.
- ▶ Population tokens (👤) cannot be removed from Secured Buildings for any reason.

If a Building ever has no Population tokens (👤), Shared tokens (👤), or Takeover tokens (🔪) on it at the end of any player's turn, that Building is immediately Secured, and is now Owned by no one.

TOKENS & EMPTY SPACES

A Building can be placed in a map space that only has tokens in it. In this case, all tokens from that space are immediately placed on that Building, with the normal effects they would cause.

This is a rare occurrence, but can happen with certain Upgrade cards or Project cards interacting.

ABILITY TYPES & LIMITS

GENERAL RULES

The text effects of Upgrade cards ( or ) and Project cards (, , or ) are Abilities, and will fall into one of five different types, listed below.

Regardless of an Ability's type, you may make use of its bonus a maximum of once on your own turn, and a maximum of once between each of your turns, unless otherwise specified.

ABILITY TYPES

- ▶ **Passive:** Grants an effect that is always available, and requires no additional effects to activate.
- ▶ **Action:** Instead of performing one of the 5 standard Actions, you may choose to perform this Action. You may still perform Bonus Actions.
- ▶ **Bonus Action:** Instead of performing one of the 2 standard Bonus Actions, you may choose to perform this Bonus Action. (You are still limited to using a maximum of 2 Bonus Actions on each of your turns).
- ▶ **Upgrade:** This modifies how an Action works, or improves other Abilities.
- ▶ **Rider:** This happens in response to, or immediately after, a particular Action or event.

RULE HIERARCHY

If a conflict exists between multiple rules from different sources, the highest source in the list below takes precedence.

- ▶ Upgrade cards ( or .
- ▶ Project cards (, , or .
- ▶ Rulebook rules.

ACTION SEQUENCING

Actions and Bonus Actions are always fully resolved, applying all Upgrades, Passives, and Riders that are relevant before the next Action or Bonus Action begins.

MATERIAL LIMITS

Each of your Production tokens (, , ) and Permanent Resources (, , ) can only be used once per turn.

MOVING TRACKERS

PRESTIGE (?)

When you gain Prestige, your marker is moved that many spaces clockwise around the Prestige track (the outside of the map).

If your marker passes the 100 space, which may happen when adding bonuses, take a 100 Prestige tile, and continue moving your marker beyond the 100 space.

ECO TRACKER (↻)

Each time Eco is *increased*, this marker is moved that many spaces anti-clockwise around the Prestige track.

Each time Eco is *decreased* (shown as **red** negative numbers on cards and map spaces), this marker is moved that many spaces clockwise around the Prestige track.

THRESHOLD VALUE (📏)

Printed on the Prestige track are a number of Threshold values (📏).

The default Threshold value at the start of the game is 1.

The current Threshold value during the game is the first printed value between the Eco Tracker (↻) and the **Collapse** space, counting from the Eco Tracker itself.

ENDING THE GAME

ENDING STATES

In order to end the game, one of four conditions must be met at the end of your turn:

- ▶ The last space on the map has a Building placed in it.
- ▶ The Eco Tracker (↻) is moved on to, or clockwise beyond, the **Collapse** space (100 (?)) on the Prestige track.
- ▶ The Eco Tracker (↻) is moved on to, or anticlockwise beyond, the **Harmony** space (40 (?)) on the Prestige track.
- ▶ Your Prestige marker is beyond the Eco Tracker (↻), clockwise, by a number of spaces equal to or greater than the current Threshold value (📏).

ACTIONS

On your turn, you may take one of five different Actions, listed below.

Note that certain game effects may modify how you use these Actions, or grant you new, unique Actions to use.

TAKE RESOURCES

From the Resources available in the general supply, you may use an Action to take either:

- ▶ 3 different Materials (☉, ☙, ☼, ☽)
- ▶ 2 of the same Material (☉, ☙, ☼, ☽), provided at least 2 Material remains in that stack
- ▶ 1 Blueprint (📄) and 1 Material (☉, ☙, ☼, ☽)

Your Supply can hold a **maximum of 12 Resources** (☉, ☙, ☼, ☽ + 📄) in any combination.

Some game effects may increase this limit, and some game effects may allow you to store Materials in other locations, such as on Buildings or cards.

On most game materials the Take Resources Action is shown with a hand symbol on top of a wild resource symbol.

The Wild Material symbol can show a '?', meaning any Material; a '=', meaning the same Material, or a '≠', meaning a different Material.

THRIVING COMMUNITY

When you have a total of 25 or more Prestige (👑), you may take one of the Thriving Community cards, which will either improve your Take Resources Action, or grant you a new option when taking resources.

RUNNING OUT OF RESOURCES

If there are no Resources left in a stack, you cannot take any of that Resources.

If you would take more Resources from stack than are left in that stack, you simply take whatever is available of that type.

RESERVE BUILDING

From the Building cards available in all rows: Level 1 (★); Level 2 (★★); or Level 3 (★★★); you may use an Action to take 1 Building card to place later. When you do this, you also gain 1 Blueprint (📄).

Only you may place Buildings that you have Reserved.

You may keep a maximum of 3 Reserved Buildings.

Immediately fill the empty slot in that Building Queue with a new Building card.

On most game materials the Reserve Building Action is shown with an arrow arcing to the left from a Building card.

URBAN RENEWAL

If you Own 3 or more Buildings of 1 type (☉, ☙, ☼, ☽), you may use an Action in order to take the top (+)

Upgrade card from the Upgrade deck of the same type.

If you have 5 or more Buildings of the same type you may take the top (+) Upgrade card instead of the top (+) Upgrade card.

You may take a maximum of 4 Upgrade cards in this way during the game. Each Upgrade card taken this way must be of a different type.

Mark these card with a Population token (👤) as a reminder.

GATHER SUPPORT

If you have 2 or more Population tokens (👤) adjacent to any

Building, you may use an Action to place a Shared token (🤝) on that Building.

If you do so, you must give 1 of your Production tokens (🌱, 🌿, 🍷, 💧), of a type different to what that Building provides, to each player with a Population token (👤) or Shared token (🤝) already on that Building.

If you place a Shared token (🤝) on a Building that is Owned by another player (it has one of their 👤 tokens on it), that Building is now a *Shared Building* for you, and you gain the following rewards:

- ▶ Production tokens (🌱, 🌿, 🍷, 💧) equal to that Building's full output.
- ▶ Any Takeover tokens (🏹) that the Building would add to your Supply.

In addition:

- ▶ You gain Prestige (👑) equal to half of that Building's Prestige value, rounding up.
- ▶ Increase Eco (🌍) by 1 (move it closer to **Harmony**) for each Population (👤) token and Shared token (🤝) already on that Building.

You cannot normally place a Shared token (🤝) on one of your Shared Buildings.

CLAIM LAND

If you have 3 or more Population tokens (👤) adjacent to any Building, you may use an Action to remove

1 Population token (👤) and all Shared tokens (🤝) from that Building.

If that Building now has 0 Population tokens (👤) on it, you may place a Takeover token (🏹) on that Building.

You gain all Prestige (👑) from that Building, and 1 Production token (🌱, 🌿, 🍷, 💧) matching its type.

For each Shared token (🤝) removed from that Building, reduce Eco (🌍) by 1 (move it closer to **Collapse**).

That Building is now considered a *Contested Building*, and the following additional effects apply to it:

- ▶ Contested Buildings cannot have Population tokens (👤), Shared tokens (🤝), or Secured tokens (🔒) placed on them.
- ▶ Contested Buildings are Owned Buildings, but do not count as having any Population tokens (👤) on them for any purpose.

BONUS ACTIONS

On your turn you may take up to two Bonus Actions, each of a different type, listed below.

Note that certain game effects may modify how you use these Bonus Actions, or grant you new, unique Bonus Actions to use.

 Bonus Actions on various cards are normally shown with a lightning bolt symbol next to their effect.

PLACE BUILDING

As a Bonus Action you may return Resources (🌿, 🍃, ⚡, 💧 + 🏠) from your Supply to the general supply equal to a Building's cost in order to take that Building card.

After you take a Building card, you may place that Building, either adjacent to an existing Building, or in a Starting Space.

After placing a Building, place one of your Population tokens (👤) on that Building to show that you Own it.

After placing a Building, refill its slot in the Building Queue.

On most game materials the Place Building Bonus Action is shown with a stacked arrow above a Building card.

BUILDING REWARDS

Gain all rewards listed for that Building.

▶ Add all Production tokens (🌿, 🍃, ⚡, 💧) from that Building to your Supply.

- ▶ Apply any Eco (🌿) changes.
- ▶ Add any Prestige (👑) to your total Prestige.
- ▶ Take any Upgrade cards (🛠️ or 🛠️🛠️) that this Building allows you to draw.

ADDITIONAL REWARDS

If you placed a Building adjacent to your largest Connected group of Buildings, you immediately gain 2 Prestige (👑).

If you placed a Building that completes or extends a line of 3 or more Buildings of the same type (🌿, 🍃, ⚡, 💧), you gain an additional reward based on that Building's type:

- ▶ 🌿: Add 1 Blueprint (🏠) to your Supply.
- ▶ 🍃: Increase Eco (🌿) by 1.
- ▶ ⚡: Gain 1 Prestige (👑).
- ▶ 💧: Gain 1 Takeover token (👤).

The Buildings that form a line may be Owned by any number of players.

UPGRADE CARD BONUSES

All Upgrade cards (🛠️ or 🛠️🛠️) add 1 Permanent Material (🌿, 🍃, ⚡, 💧) of the appropriate type (shown above the text effect) to your Supply.

🛠️🛠️ Upgrade cards may also grant additional Permanent Materials, Eco (🌿), or Prestige (👑).

If you give an Upgrade card to another player (usually as part of its text effect), you lose the matching Permanent Materials, and that player gains that Permanent Material.

Eco and Prestige are not modified.

MATERIAL DISCOUNTS

- ▶ Buildings on the map will usually provide a Material Discount to any Buildings placed adjacent to them.
- ▶ A Building's Material cost is reduced by 1 for each Natural Resource it is placed on.
- ▶ A Building's Material cost is reduced by 1 for each Production token of that type (🌾, 🌿, ⚡, 💧) you have in your Supply.
- ▶ A Building's Material cost is reduced by 1 for each permanent Material (🌿, ⚡, 💧) shown on your Project cards.

For each Material type (🌾, 🌿, ⚡, 💧), a Building's Material costs can be reduced by a maximum of 5 by each of the effects listed above.

BLUEPRINT DISCOUNTS

- ▶ Buildings on the map may provide a Blueprint (📄) Discount to any Buildings placed adjacent to them.
- ▶ A Building's Blueprint cost is reduced by 1 for each permanent Blueprint (📄) on your Project cards.

TAX THE RICH

Regardless of available discounts, if you have 4 or more of a Material (🌾, 🌿, ⚡, 💧) in your Supply, you *must* spend those before applying the reductions above.

This keeps the limited amount of Materials circulating and keeps the economy alive within the game.

START PROJECT

Return Production tokens (🌿, 🍀, 💧) from your Supply to the general supply equal to a Project's cost in order to take that Project card.

The first Project card you take each game must be a Level 1 card (⚙️).

To take a Level 2 card (⚙️⚙️) you must either have a Level 1 card (⚙️) of any type, or Own at least 1 Level 2 (★★) or Level 3 Building (★★★).

To take a Level 3 card (⚙️⚙️⚙️) you must either have a Level 2 card (⚙️⚙️) of any type, or Own at least 1 Level 3 Building (★★★).

PROJECT REWARDS

Gain all rewards listed on the right hand side of the Project card.

- ▶ Apply any Eco (🌐) changes.
- ▶ Add any Prestige (🏆) to your total Prestige.
- ▶ Resource rewards (🌿, 🍀, 🌟, 💧 + 📄) on your Project cards are *permanent* Materials and Blueprints—these Resources are always available to you, and never take up any space in your Supply.

SPECIAL REWARD

If you take a Project card with the symbol to the left, you may immediately place any Building that costs a total of 9 or less Materials (🌿, 🍀, 🌟, 💧). You must pay for Blueprints (📄) as normal.

PROJECT BONUSES & MAXIMUMS

On the reverse of all Level 2 (⚙️⚙️) and Level 3 (⚙️⚙️⚙️) Project cards are additional bonuses that are checked at the end of the game.

You can have a **maximum of 12 Project Cards**.

You can have a **maximum of 1 Level 3 (⚙️⚙️⚙️) Project card of each colour**.

VICTORY CONDITIONS

WINNING BY PRESTIGE

If your Prestige marker is beyond the Eco Tracker (👤) by the current Threshold value (🔢) at the end of any of your turns, the game ends, and Prestige (🔢) is totalled.

If the Threshold value is equal to or lower than the indicated value, you may add the bonuses below.

BONUS PRESTIGE

🏠🏠🏠 Largest community

Gain 5 Prestige if you have the largest Connected group of Buildings.

🏠🏠🏠🏠 Most Owned Buildings

For each type (🌱/🌿/🌳/💧) of Building that you Own the most of, Gain 5 Prestige.

🔧 Project Bonuses

On the reverse of all Level 2 (🔧🔧) and Level 3 (🔧🔧🔧) Project cards are additional bonuses. If the Threshold value is within the indicated range of values, you may add that bonus to your Prestige (🔢).

WINNING BY ECO

If the Eco Tracker (👤) is on the **Harmony** space (in line with 40 Prestige) at the end of your turn, the game ends and all players win: You have created a thriving, self-sustained, ecologically harmonious community.

The first among equals is the player with the most total Eco (👤) across all their Buildings and Project cards (🔧, 🔧🔧, and 🔧🔧🔧).

LOSS CONDITIONS

LOSING BY ECO

If the Eco Tracker (👤) is on **Collapse** (in line with 0/100 Prestige) at the end of your turn, all players lose this game: Environmental mismanagement dooms this community to repeat the mistakes of the past.

The least bad is the player with highest combined total of Upgrade cards (🔧 or 🔧🔧) and Shared tokens (👤) on the map.

LOSING BY TOTAL BUILDINGS

If the last space on the map is filled by the end of your turn, all players lose this game: Overpopulation dooms this community to a life of scarcity and hardship among the ruins of the old world.

The least bad is the player with the lowest total number of Population tokens (👤) and Shared tokens (👤) on the map.

QUICK REFERENCE

On your turn you may perform 1 Action & 2 Bonus Actions.

ACTIONS

TAKE RESOURCES (CHOOSE ONE OPTION)

- ▶ 3 different Materials (🌱, 🍃, ⚡, 💧).
- ▶ 2 of the same Material (🌱, 🍃, ⚡, 💧), leaving 2 in the stack.
- ▶ 1 Blueprint (📄) and 1 Material (🌱, 🍃, ⚡, 💧).

GATHER SUPPORT

- ▶ You must have 2+ Population tokens (👤) adjacent to the target Building.
- ▶ Give 1 Production token* (🏠, 🌿, ⚡, 💧) to each player with a Population token (👤) or Shared token (🤝) on that Building.
- ▶ Place a Shared token (🤝) on that Building.
 - ▶ Gain half Prestige from that Building, rounding up.
 - ▶ Gain Production tokens (🏠, 🌿, ⚡, 💧) equal to that Building's rewards.
 - ▶ Increase Eco (❓) by 1 for each Population (👤) token and Shared token (🤝) already on that Building.

BONUS ACTIONS

Each Bonus Action may only be performed once per turn:

PLACE BUILDING

- ▶ Pay that Building's cost (🌱, 🍃, ⚡, 💧 + 📄), after applying all available discounts.
 - ▶ If you have 4+ of a Material in your Supply, you must first pay with that.
- ▶ Place that Building on the map, adjacent to an existing Building, or in a black bordered space.
 - ▶ Place a Population token (👤) on that building.
 - ▶ Gain all rewards listed on that Building.

RESERVE BUILDING

- ▶ Take a Building card of any level (★, ★★, or ★★★).
- ▶ Take 1 Blueprint (📄).

URBAN RENEWAL

- ▶ You must have 3+ Buildings of the same type (🌱, 🍃, ⚡, 💧).
- ▶ Take the top + Upgrade card of that type.
 - ▶ If you have 5+ Buildings of the same type, take the top ++ Upgrade card instead.
- ▶ You can take a maximum of 1 Upgrade card of each type this way.

CLAIM LAND

- ▶ You must have 3+ Population tokens (👤) adjacent to the target Building.
- ▶ Remove 1 Population token (👤) and all Shared tokens (🤝) from that Building.
- ▶ Place a Takeover token (🏹) on that Building.
 - ▶ Gain all Prestige from that Building.
 - ▶ Gain 1 Production token (🏠, 🌿, ⚡, 💧) from that Building's rewards.
 - ▶ Reduce Eco (❓) by 1 for each Shared token (🤝) removed from that Building.

START PROJECT

- ▶ Pay that Project card's cost with your Production tokens (🏠, 🌿, ⚡, 💧).
 - ▶ You may remove your 🏹 or 🤝 tokens to count as 1 Production of the same type as the Building they were removed from.
- ▶ Take that Project card.
 - ▶ Gain the rewards listed on that Project.

You may perform your Action and any Bonus Actions in whatever order you prefer.

MAXIMUMS

- ▶ 12 Resources (🌱, 🍃, ⚡, 💧 + 📄) in your Supply.
- ▶ 12 Project cards (🔧, 🔧🔧, or 🔧🔧🔧) in any combination.
- ▶ 1 Level 3 Project (🔧🔧🔧) of each type.
