

SOLARPUNK

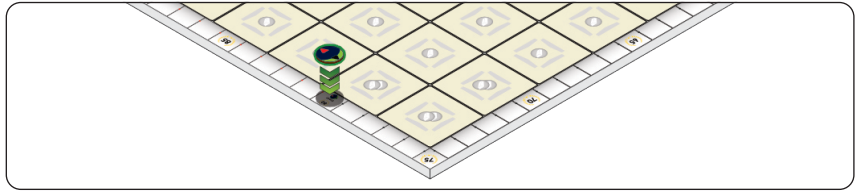

A game by Phil Grey
Artwork by Carlos Itsumi

Version 2.0

GAME SETUP

1. Place the map in the middle of the playing area.

Place the Eco Tracker (🌿) on its starting space on the map (80 Prestige).

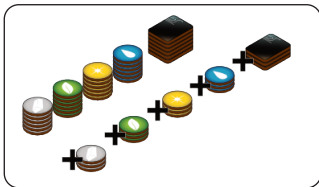

2. Separate the Building cards by level (★, ★★, or ★★★) and shuffle each stack.

Flip the top 5 cards from each stack and spread them out to create a market row for each stack.

3. Separate the Upgrade cards by level (⊕ or ⊕⊕) and Material (🌿, 🍃, 🌟, 💧). Shuffle each stack and place them near the map.

4. Separate out the Project cards by level (🌀, 🌀🌀, or 🌀🌀🌀), reward and Material (🌿, 🍃, 🌟, 💧). Lay these stacks out near the map, in easy reach of all players.

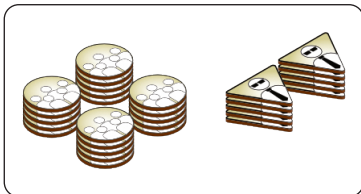

5. Add 6 Resources (🌿, 🍃, 🌟, 💧 + 🏠) of each type to form a stack of available Resources for this game.

For each player taking part in this game, add 3 Resources of the appropriate type to each stack.

6. Place the Production tokens (🏠, 🍃, 🌟, 💧) near the map, in easy reach of all players.

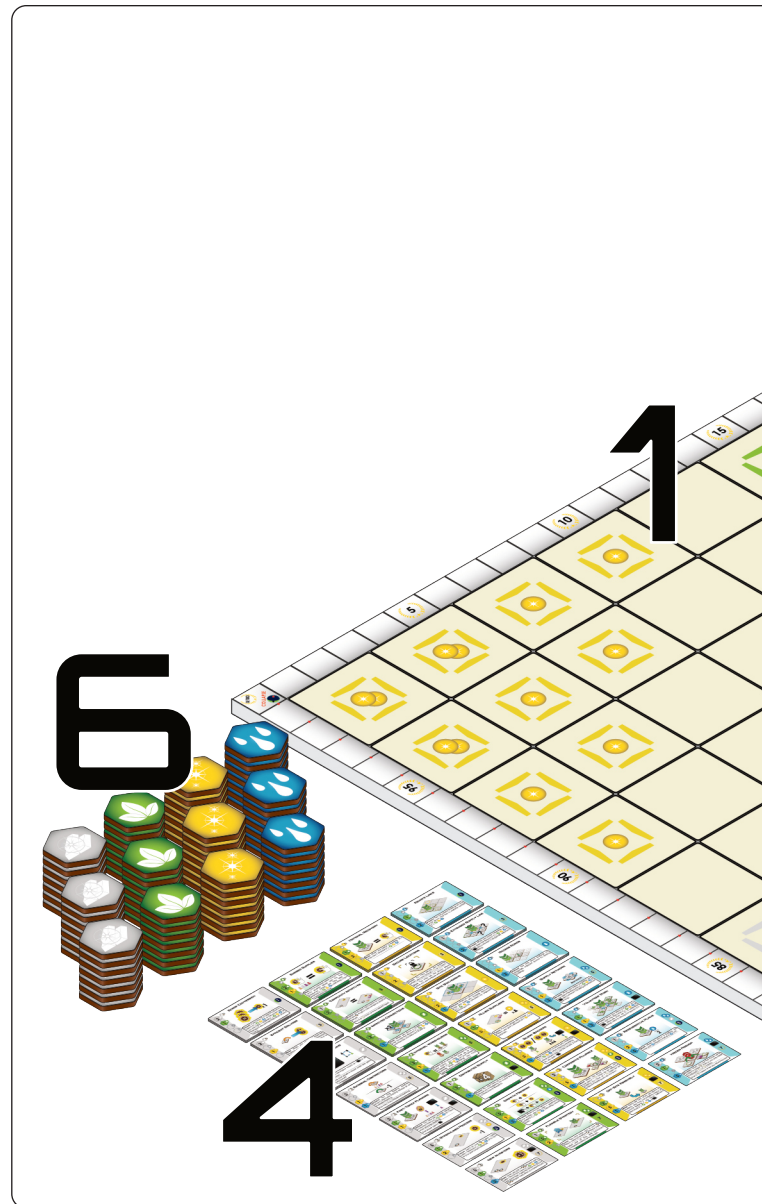

7. Each player chooses a colour and takes all of their tokens (🏠/🍃 & 🏠) in that colour.

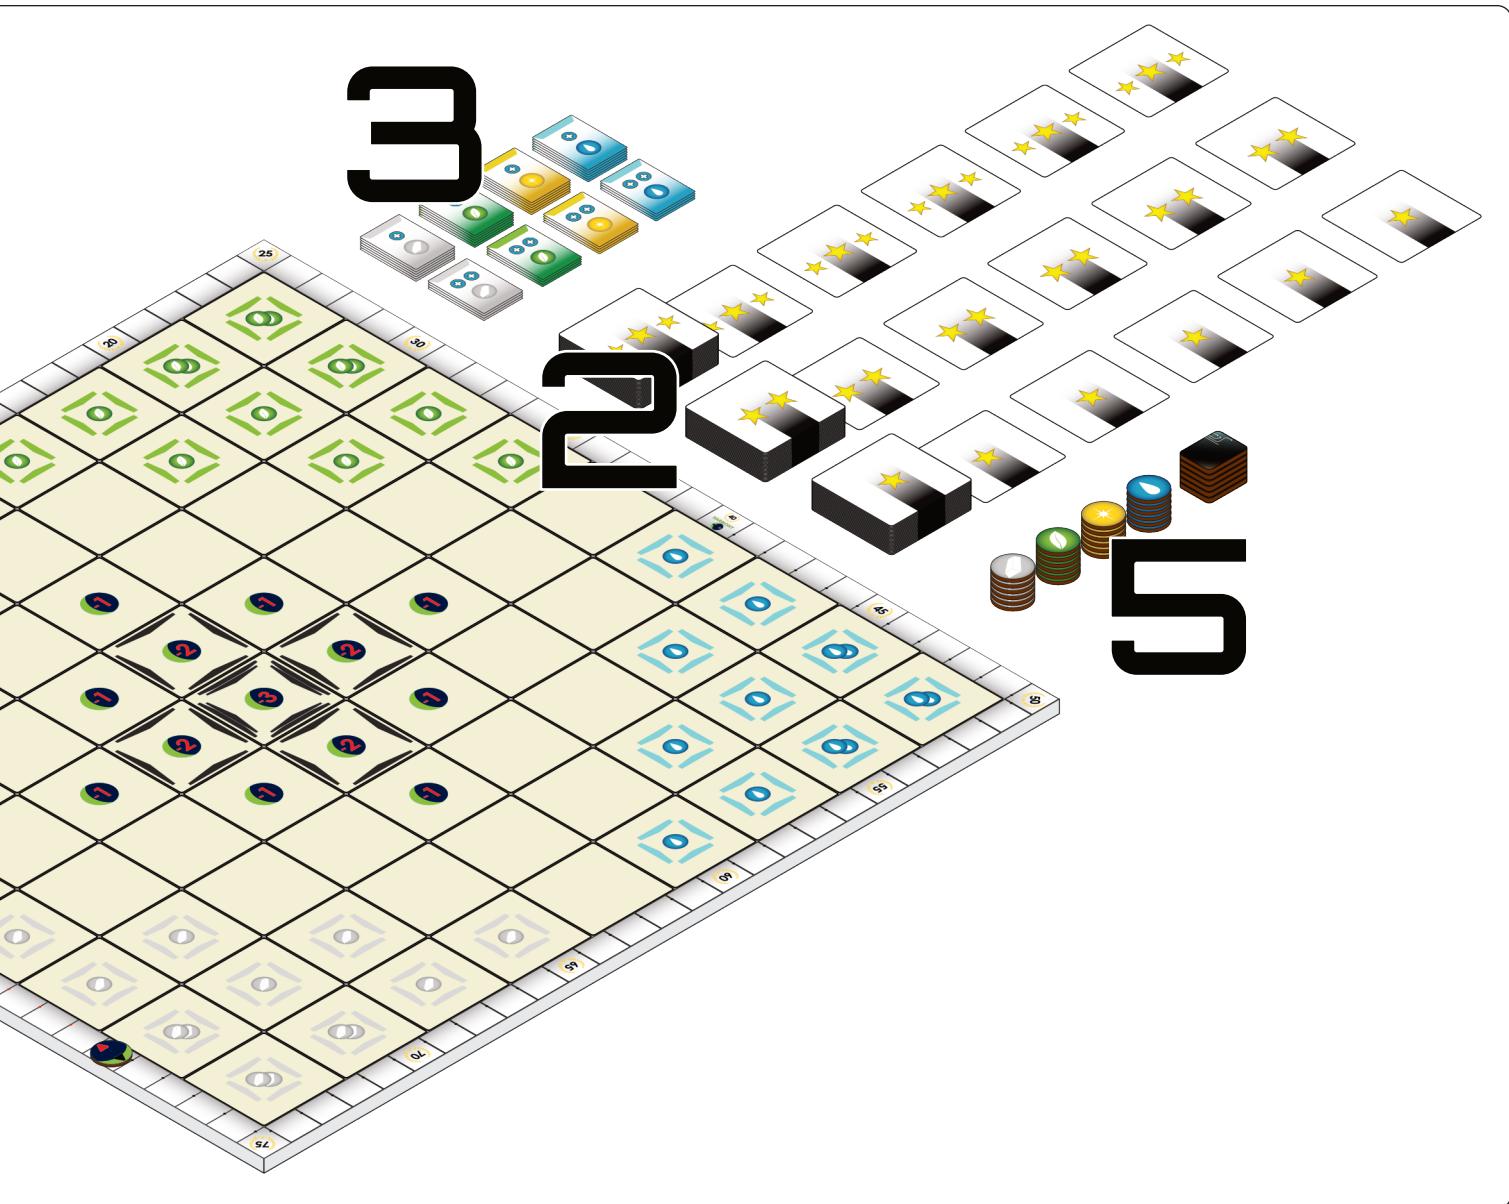

Each player takes a number of Takeover tokens (🏠) equal to the number of players in the game, then sets the rest aside.

8. Each player places their Prestige marker on the 0/100 Prestige space in the corner of the map.

The last person to build something is the first player, and takes the first turn.

Solarpunk is a game where you take on the role of small group of people collecting resources and trying to build a better world, first by repurposing old structures, then creating dedicated and environmentally sound buildings that are in harmony with nature.

Buildings generate production, which is used both to bring down the costs of larger, more complex structures, and also to start long lasting projects that will give you advantages for the rest of the game.

Some buildings are special, and will grant you prestige, pushing you closer to victory. Other buildings will improve ecological harmony, or eco. Some buildings have unique upgrades that will allow you to use special game-changing effects once you build them.

Early building spaces, and some early, high-prestige buildings will actively harm eco, bringing the environment closer to collapse. Be mindful of this, as it can create a certain difficulty spike in the early game—like in real life, getting people to change habits and adopt new technology is fraught with difficulty.

You must also be mindful of the total space available to you, because if you fill the last square on the map, everyone loses due to overpopulation. Even the best laid plans can run afoul of people's desire for more space, or bigger families.

This means finding the ability to share buildings, or even being aggressive and taking them over yourself, may be better than trying to build every shiny thing you can lay your hands on. Be willing to try a new strategy if your current plan doesn't seem to be working. Adaptability is key to creating a sustainable future.

ACTIONS

On your turn, you may take one of three different actions, listed below.

Note that certain game effects may modify how you use these actions, or grant you new, unique actions to use.

TAKE RESOURCES

From the Resources available in the general supply, you may take either:

- ▶ 3 different Materials (, , , )
- ▶ 2 of the same Material (, , , ), provided at least 2 Material remains in that stack
- ▶ 1 Blueprint () and 1 Material (, , , )

Your Supply can hold a **maximum of 12 Resources** (, , ,  + ) in any combination.

Some game effects may increase this limit, and some game effects may allow you to store Materials in other locations, such as on Buildings or cards.

On most game materials the Take Resources Action is shown with a hand symbol on top of a wild resource symbol.

The Wild Material symbol can show a '?', meaning any Material; a '=', meaning the same Material, or a '≠', meaning a different Material.

RESERVE BUILDING

From the Building cards available in all rows: Level 1 (★); Level 2 (★★); or Level 3 (★★★); you may take 1 to place later. When you do this, you also gain 1 Blueprint ()

Only you may place Buildings that you have Reserved.

You may keep a maximum of 3 Reserved Buildings.

Refill the empty slot in the Building row at the end of your turn.

On most game materials the Reserve Building Action is shown with an arrow arcing to the left from a Building card.

CLAIM LAND

If you have 3 or more Population tokens () adjacent to any Building, you may use an Action to remove 1 Population token () and all Shared tokens () from that Building.

If that Building now has 0 Population tokens () on it, you may place a Takeover token () on that Building.

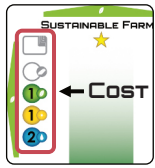

You gain all Prestige () from that Building, and 1 Production token (, , , ) matching its type. The previous Owner loses all Prestige from that Building.

For each Shared token () removed from that Building, reduce Eco () by 1 (move it closer to Collapse).

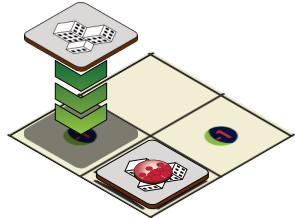

BONUS ACTIONS

On your turn you may take one bonus action of each type, listed below.

PLACE BUILDING

Return Resources (1 wood, 1 food, 2 water + 1 building token) from your Supply to the general supply equal to a Building's cost to take a Building card.

After you take a Building card, you may place that Building anywhere on the map, either adjacent to an existing Building, or in a black bordered square (near the middle of the map).

After placing a Building, place one of your Population tokens (1 token) on that Building to show that you Own it.

Gain all rewards listed for that Building.

- ▶ Apply any Eco (Eco) changes.
- ▶ Add any Prestige (Prestige) to your total Prestige.
- ▶ Add all Production tokens (1 wood, 1 food, 1 water) from that Building to your Supply.

Material Discounts

- ▶ A Building's Material cost is reduced by 1 for each appropriate Material discount adjacent to it.
- ▶ A Building's Material cost is reduced by 1 for each Production token (1 wood, 1 food, 1 water) you have in your Supply, to a maximum discount of 5 of each Material.

- ▶ A Building's Material cost is reduced by 1 for each Material symbol it is placed on.
- ▶ A Building's Material cost is reduced by 1 for each permanent Material on your Project cards.

Blueprint Discounts

- ▶ A Building's Blueprint cost is reduced by 1 for each Blueprint discount adjacent to it.
- ▶ A Building's Blueprint cost is reduced by 1 for each permanent Blueprint on your Project cards.
- ▶ A Building's Blueprint cost may be reduced by 1 by returning one of your Reserved Buildings to the end of the appropriate Building row: Level 1 (★); Level 2 (★★); or Level 3 (★★★), extending that row.

On most game materials the Place Building Bonus Action is shown with a stacked arrow above a Building card.

START PROJECT

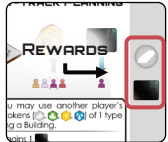

Return Production tokens (🏠, 🌿, 🏗️, 💧) from your Supply to the general supply equal to a Project's cost in order to take that Project card.

The first Project card you take each game must be a Level 1 card (⚙️).

To take a Level 2 card (⚙️⚙️) you must either have 2 Level 1 cards (⚙️) of any type(s), or own at least 1 Level 2 Building (★ ★).

To take a Level 3 card (⚙️⚙️⚙️) you must either have 2 Level 2 cards (⚙️⚙️) of any type(s), or own at least 1 Level 3 Building (★ ★ ★).

Gain all rewards listed on the right hand side of the Project card.

- ▶ Apply any Eco (🌿) changes.
- ▶ Add any Prestige (🌟) to your total Prestige.
- ▶ Resources shown as rewards on Project cards are permanent Materials and Blueprints—these Resources are always available to you, and do not take up any space in your Supply.

On the reverse of all Level 2 (⚙️⚙️) and Level 3 (⚙️⚙️⚙️) Project cards are additional bonuses that are checked at the end of the game. These bonuses can increase Eco, add to your Prestige, or increase your total number of Owned Buildings.

You can have a **maximum of 12 Project Cards**.

You can have a **maximum of 1 Level 3 (⚙️⚙️⚙️) Project card of each colour**.

INTERACTING WITH BUILDINGS

SHARING BUILDINGS

If you place a Shared token () on a Building that is Owned by another player, you gain all of that Building's listed rewards, except Prestige () and Eco ()

- ▶ You gain Production tokens (, , , ) equal to that Building's full output.
- ▶ You gain any Upgrade cards () or   that placing the Building would draw.
- ▶ You gain any Takeover tokens () that the Building adds to your Supply.

In addition:

- ▶ You gain Prestige () equal to half that Building's Prestige value, rounding up.
- ▶ Increase Eco () by 1 (move it closer to Harmony) for each Population () token or Shared token () already on that Building.

You cannot normally place a Shared token () on a Building that already has one of your Shared tokens on it.

HOSTILE BUILDINGS

A Building is considered Hostile if it has a Takeover token () on it.

- ▶ Hostile Buildings cannot have Population tokens (), Shared tokens (), or Secured tokens () placed on them.
- ▶ Hostile Buildings are Owned Buildings, but do not count as having any Population tokens () on them for any purpose.

SECURED BUILDINGS

A Building is considered Secured if it has a Secured token () on it, or the Secured symbol as one of its rewards.

- ▶ Secured Buildings cannot have Shared tokens () or Takeover tokens () placed on them for any reason.
- ▶ Population tokens () cannot be removed from Secured Buildings for any reason.

ABILITY TYPES & LIMITS

GENERAL RULES

The text effects of Upgrade cards () or   and Project cards (, , or ) are Abilities, and will fall into one of four types, listed below.

Regardless of an Ability's type, you may make use of its bonus a maximum of once on your own turn, and a maximum of once between each of your turns, unless otherwise specified.

ABILITY TYPES

- ▶ **Passive:** Grants an effect that is always available, and requires no additional effects to activate.
- ▶ **Action:** Instead of performing one of the 3 standard Actions, you may choose to perform this Action. You may still perform Bonus Actions.
- ▶ **Upgrade:** This modifies how an Action works, or improves other Abilities.
- ▶ **Rider:** This happens in response to, or immediately after a particular Action.

RULE HIERARCHY

If a conflict exists between multiple rules from different sources, the highest source in the list below takes precedence.

- ▶ Upgrade cards () or   supersede Project cards (, , or ) and the core rules if any conflict exists.
- ▶ Project cards (, , or ) supersede the core rules if any conflict exists.

VICTORY CONDITIONS

WINNING BY PRESTIGE

If your Prestige marker is beyond the Eco Tracker () at the end of any of your turns, the game ends, and Prestige () is totalled up, adding the bonuses below, and any endgame bonuses from Project cards. Most Prestige wins.

BONUS PRESTIGE

Longest line of Owned Buildings

Buildings	3	4	5	6	7	8	9
Prestige	2	3	5	8	12	17	23

Most Owned Buildings of each colour

Player Count	1st	2nd	3rd
4	5	3	1
3	3	1	0
2	2	0	

WINNING BY ECO

If the Eco Tracker () is on **Harmony** (in line with 40 Prestige) at the end of any player's turn, the game ends and all players win: They have created a thriving, self-sustained, ecologically harmonious community.

If the Eco Tracker is moved to the Harmony space when adding endgame bonuses, players may either choose to have a shared win as described above, or continue using Prestige to establish a clear winner.

LOSS CONDITIONS

LOSING BY ECO

If the Eco Tracker () is on **Collapse** (in line with 0/100 Prestige) at the end of any player's turn, all players lose this game: Environmental mismanagement has doomed this community to repeat the mistakes of the past.

Alternatively, in this case, the player with the highest total Eco () across all their Owned Buildings is declared the winner. Shared tokens () are worth 1 Eco each. All other players lose.

LOSING BY TOTAL BUILDINGS

If a player places a Building and it fills up the last empty space on the map, all players lose this game: Overpopulation dooms this community to a life of scarcity and hardship among the ruins of the old world.

Alternatively, in this case, the player with the lowest total number of Population tokens () and Shared tokens () on the map is declared the winner, and all other players lose.

QUICK REFERENCE

On your turn you may perform 1 Action:

TAKE RESOURCES (CHOOSE ONE OPTION)

- ▶ 3 different Materials (, , , , ).
- ▶ 2 of the same Material (, , , , , leaving 2 in the stack.
- ▶ 1 Blueprint () and 1 Material (, , , .

RESERVE BUILDING

- ▶ Take a Building card of any level (★, ★★, or ★★★).
- ▶ Take 1 Blueprint (.

CLAIM LAND

- ▶ You must have 3+ Population tokens () adjacent to the target Building.
- ▶ Remove 1 Population token () and all Shared tokens () from that Building.
- ▶ Place a Takeover token on that Building.
 - ▶ Gain all Prestige from that Building, old Owner loses all Prestige from Building.
 - ▶ Gain 1 Production token (, , , ) from that Building's rewards.
 - ▶ Reduce Eco () by 1 for each Shared token () removed from that Building.

You may perform each Bonus Action once:

PLACE BUILDING

- ▶ Pay that Building's cost (, , , , , after applying all available discounts.
- ▶ Place that Building on the map, adjacent to an existing Building, or in a black bordered space.
 - ▶ Place a Population token () on that building.
 - ▶ Gain all rewards listed on that Building.

START PROJECT

- ▶ Pay that Project card's cost (, , , .
- ▶ Take that Project card.
 - ▶ Gain the rewards listed on that Project.

You may perform your Action and any Bonus Actions in whatever order you prefer.

MAXIMUMS

- ▶ 12 Resources (, , , , ) in your Supply.
- ▶ 12 Project cards (, , , or , ) in any combination.
- ▶ 1 Level 3 Project (, , ) of each colour.
